INTRODUCCIÓN PERSONAL

I am Josué Molina from Ecuador. I am 24 years old and I am currently studying production engineering at the University of Guayaquil. I choose this career because Ecuador becomes more productive as time goes by, more companies emerge and more and more production engineers are needed. I am the middle brother in my family, I have a sister who was born with me, we are twins.

The main reason why I want to be part of this program is because I want to interact with other people from other cultures, I want to improve my English, get to know what American culture is like, go sightseeing with friends and get to know the different places that are part of the United States. , also improve my work skills.

I think this experience would help me a lot as a person and in my work environment, it would teach me to be more sociable and independent.
